Frequently Asked Questions

Do bio-fireplaces heat?

The heat is not lost in the chimney and then the thermal efficiency is 100%.

Depending on your needs, you can choose a range of burners with different capacities:

1. Fire-00 from 1.5 Kw/h (recommended to properly warm environments from 30 to 45 cube meters)
2. Fire-01 from 3.00 Kw/h (recommended to properly warm environments from 45 to 75 cube meters)
3. Fire-02 from 4.5 Kw/h (recommended to properly warm environments from 75 to 105 cube meters).

Do it need the chimney?

The Hearth of Wellness fireplaces don't need a chimney, since during combustion, the bioethanol does not loose in the air toxic powders, harmful for the health.

Do they need special cleaning?

The Hearth of Wellness fireplaces do not have to be cleaned from ashes and they can be cleaned like other furnitures.

For the burner cleaning use common products for stainless steel (the same normally used in the kitchen). Periodically, remove the halos around the opening of the flame, to avoid that in the long-lasting period it releases foul odours.

Can they be placed everywhere?

The Hearth of Wellness fireplaces, not having the need of a chimney, they can be placed everywhere.

Do they need particular services?

The Hearth of Wellness fireplaces and burners don't need particular services.

Where can I buy bioethanol?

It's possible to order bioethanol directly from our dealers, it is important to use pure bioethanol (96%)
